

Long Range Explorer Yachts

UP TO 96 FT.

A COLLECTION OF DESIGNS AND ARTICLES
PUBLISHED BY

INTRODUCTION

Welcome to our most recent collection of designs and articles. Our initial “Book of Dreams” encompassed such a broad scope since we first started this journey in design and research that we decided to create more specific collections featuring vessels by type or category. This collection focuses on Long Range / Explorer Yachts up to 96 ft (29 m). As a company, we have been around a while, since 1974, and our varied experiences and depth of research have contributed to the creation of what we feel are exceptionally interesting and innovative designs.

We are looking to the future and have chosen to design keeping in mind these goals: low environmental impact, ecofriendly recyclable end-use, and reduced carbon footprint; while including style, function, comfort, efficiency and innovation. Our hull technology is leading-edge, and our dedication to exceeding our clients’ expectations moves us forward every day.

I hope you will enjoy this collection, and please do check out our website for new and interesting updates on our work.

Cost: \$20.00 CAD for electronic version. Contact us to order one.

Patrick J. Bray, N.A., Eng.L.
